10	$x = 3$ $y = -4$	M1	for a correct method to eliminate either variable or rearrangement of one equation leading to substitution (condone one arithmetic error)	
		A1	for either $x = 3$ **or** $y = -4$	
		M1	(dep M1) for a correct substitution of found value into one of the equations or a correct method leading to the second value (condone one arithmetic error)	
		A1	for $x = 3$ and $y = -4$	
			NB Trial and improvement methods score 0 marks unless both x and y are correct
