

**26** Kasim has some small jars, some medium jars and some large jars.  
He has a total of 400 jars.

$\frac{3}{8}$  of the 400 jars are empty.

For the empty jars,

number of small jars : number of medium jars = 3 : 4  
number of medium jars : number of large jars = 1 : 2

Work out the percentage of Kasim’s jars that are empty small jars.
