**9** The cumulative frequency graph gives information about the marks that 60 students got in a test.

For these 60 students
  the highest mark was 74
  the lowest mark was 8

(a) On the grid below, draw a box plot for the distribution of the marks.

**(3)**

The pass mark for the test was 40

Sian says,

"30% of the 60 students passed the test."

(b) Is Sian correct?
You must show how you get your answer.

**(3)**
