16 (a) Simplify $m \times m \times m \times m$

....
(1)

In a competition, a player gets

> 5 points for each game they win
> 2 points for each game they draw
> 0 points for each game they lose.

Amy wins x games and draws y games.

(b) Write down an expression, in terms of x and y, for the total number of points Amy gets.
